

B2C Commerce

The premiere delivery service to Japan.

Market-proven capabilities in handling over 1.2 billion parcels a year

Though consumers in Japan can access your website with “one click”, tapping into Japanese online consumers involves more than simply putting up a website in Japanese. What is the duty threshold in Japan? What are the customs entry requirements for NFR? What is a personal import?

Based on more than 30 years of experience in the B2C market, we offer a combination of expertise from direct marketing to small parcel logistics with cost-effective, reliable and flexible distribution services.

Yamato's Strength

Price competitive

We offer lower rates than USPS PMI (Priority Mail International) Small Flat-Rates Box. Let us quote you first, and you'll see how Yamato is different from other shipping companies.

Network and Delivery Infrastructure

There are 26 locations in the U.S. and Canada including 6 gateways. We have over 12,000 operation centers in Japan for handling small parcels.

Financial Risk Hedge

COD, DDP, DDU are available.

All-in-one technology designed especially for global parcel shipping

You can process shipments, print out barcode-compatible labels, manage shipment history, track packages, automatically email your customers shipping confirmation with ETA, and much more.

Reliable Transit Time

Delivery will be made within 6 business days. Export IT systems with Japan Customs interface and delivery all-year round, 365 days a year make fast, smooth shipping possible.

Other convenient services for your customers
