Notice Regarding Security Enhancements

As always, we thank you for your continued patronage with Yamato Group.

In order to protect our customers' information and ensure secure communication, our website no longer supports the "TLS 1.0/1.1" protocol.

As a result of this change, some browsers will no longer be able to view our website or use its services from April 29th 2018 (UTC).

Affected browsing environments:

- Smartphone
Default browsers for iOS 4 (or earlier) and Android 4.4 (or earlier)
- Computer
Internet Explorer 10.0 (or earlier)

Most customers use a "TLS 1.2" enabled browser and can continue viewing our site as usual, but customers using browsers without this protocol will not be able to view our website.

If you cannot view our website, please enable "TLS 1.2" in your browser's security settings or try accessing it again with a browser that has it pre-enabled.

For details regarding browser settings, please refer to the browser documentation for help.

We apologize for any inconvenience this may cause and appreciate your understanding.
